Pilgrim Named Best Overall Fireplace Tools

To get the most out of your cozy wood-burning fireplace, you need a great set of fireplace tools nearby. To move logs around and help add more fuel if needed. They are also useful for cleaning ash.

“If you have a wood-burning fireplace inside the home, fire tools are a necessity. You will need a minimum of a poker stick, ash shovel, ashtray, tongs and possibly even a broom. These tools help you to reposition the logs within the fire and remove excess ash and soot that can work its way into the air in the home” says Glenn Wiseman, sales manager at Top Hat Home Comfort Services.

Best Overall: Pilgrim Fireplace Tool Set

Large Hearth Tool Set - 18014

While this set from Pilgrim Hearth & Home contains the best fireplace tools overall, we think it’s especially well-suited to homes or commercial settings with large fireplaces. The tools are 39 inches, longer than most options on this list, and it’s also the largest set on offer from the brand. It comes with four tools: a fire poker, shovel, tongs, and a natural fiber corn broom.

Brady recommends the set for its timeless elegance and excellent quality. “This tool set is meticulously crafted for grand hearth installations and enhances the ambiance of any space.” It’s made from solid wrought iron and will probably last you for decades with proper maintenance. In fact, the company backs this product with a lifetime warranty.

We like that the stand features lovely curved hooks to store the tools. Our sole issue is the price: it costs \$405, which is a lot considering you can get similar sets for cheaper. Nevertheless, if you do not mind paying the price, it’s worth the money because it will last forever.

Product Details: Tools Included: Poker, shovel, tongs, broom | **Material:** Iron | **Height:** 39 inches
